DAKSH KALRA

Tempe, AZ • daksh.kalra777@gmail.com • dkalra13@asu.edu

CS student seeking a technology internship, with experience across full-stack web development (React/Firebase), applied AI/ML fundamentals, and CFD research — backed by a record of award-winning technical work and student leadership.

EDUCATION

Arizona State University — Ira A. Fulton Schools of Engineering *Tempe, AZ*

Barrett, The Honors College • B.S. in Computer Science — Expected May 2030 • Sophomore Standing

Current ASU GPA: 4.0 (in progress)

High School: 3.98 Unweighted / 4.89 Weighted GPA • Class Rank: 1 of 578 • SAT: 1410 (Math 770) • 13 AP Courses

Relevant Coursework: Object-Oriented Programming (CSE 205), Calculus for Engineers III (MAT 267), Introduction to Engineering (FSE 100)

Scholarship: New American Scholarship — $8,000 (Arizona State University)

TECHNICAL SKILLS

Languages: Java (Certified), Python, JavaScript

Web / Frameworks: React, HTML/CSS, Firebase

Tools & Practices: Git, version control, agile team collaboration

Problem Solving: LeetCode — 25+ problems solved, 90th+ percentile runtime

Additional: Bilingual (English, Hindi), public speaking, technical leadership

PROJECTS

FBLA Competition Web Applications *React, JavaScript, HTML/CSS, Firebase, Git*

- GPA Calculator — tracked GPA trends over time and served curated articles/resources tailored to help students improve their grades
- Financial Tracker — AI-powered budgeting app featuring a chatbot for personalized spending insights and OCR-based receipt scanning that auto-logged transactions
- Lost & Found Platform — built a matching algorithm that surfaces the closest-match item to a lost report, plus in-app chat with filters for coordinating handoffs
- Local Business Finder — job board with coupon filters and an event-vendor application flow; added review sentiment analysis that scores feedback positive/negative and surfaces improvement insights, collaborative shipment coordination between businesses, and profit-maximization calculators
- Built full-stack (React, Firebase) solo across all four applications; every app placed at state and/or national competition levels

AI Model Built From Scratch *Python — In Progress*

- Independently implementing core AI/ML concepts (neural network fundamentals, forward/backward propagation, gradient descent) from the ground up without pre-built ML libraries
- Self-directed study of model internals to build deeper, first-principles understanding of how machine learning systems work

Aerodynamic Drag Reduction via Vortex Generators *CFD Simulation Study*

- Independently designed and ran a CFD simulation study on a DrivAer fastback vehicle model to evaluate the aerodynamic effect of vortex generators
- Tested multiple vortex-generator configurations and placements, identifying a configuration that reduced average drag coefficient by ~11% versus baseline

LEADERSHIP & ACTIVITIES

Founder, Vice President & President — Coding Club *High School*

- Founded and grew the club to 20+ active members; led weekly programming workshops and hands-on projects
- Organized and hosted the club's first hackathon event for members

Treasurer / Officer — FBLA Chapter *High School*

- Ran chapter fundraising campaigns that increased funds raised by $1,100+, cutting travel costs for a 60-member chapter
- Contributed to the chapter earning Gold Champion Chapter status

Founder & Vice President — Math Honor Society *High School*

- Founded the chapter and helped 25+ members prepare for AP and SAT exams through peer tutoring sessions

AWARDS & COMPETITIVE ACHIEVEMENTS

Future Business Leaders of America (FBLA) *3x State Qualifier, 3x National Qualifier*

- Senior Year: 1st Place, State — Virtual Business Challenge (13th Nationally); 2nd Regionals / 4th State — Web Development (Nationals Qualifier); 5th Place, State — Coding & Programming
- Junior Year: 1st Place, State — Coding & Programming • Sophomore Year: 2nd Place, State — Introduction to Programming

AP Cybersecurity — Selected Pilot Program Participant

- Hand-selected for a nationally limited pilot program offered at only a select group of schools; earned an A and passed the cumulative final
